

Project Name: Lawyer Hiring System

Project Overview:

The Lawyer Hiring System is a web application designed to facilitate the hiring of lawyers by clients for their legal cases. The system will allow clients to search for lawyers, view lawyer profiles, and hire lawyers based on their specialization, ratings, and case history. Lawyers will be able to create profiles, follow other lawyers, and interact with clients through posts and comments.

User Roles:	<ol style="list-style-type: none">1. Client2. Lawyer
User Authentication:	<ol style="list-style-type: none">1. Users can register as clients or lawyers.2. Client registration requires verification through National ID (NID) card.3.
